ABOUT

- I'm a dedicated tech enthusiast, driven by the curiosity to explore emerging technologies. My aspiration is to delve into the world of Automation, where I can leverage my expertise in electronics and machine learning to contribute to a future

SKILLS SUMMARY

- **Programming Languages:** Python, R , SQL , C
- **Skills:** Machine Learning , Deep Learning , NLP(Transformers) , Computer Vision, Data Engineering , Data Analytics
- **Technologies and Tools:** Pandas, Numpy , Docker, Tableau, Looker Studio, Amazon Redshift, AWS Athena, BigQuery, Git , Elasticsearch , Kibana , Logstash , Kafka , OpenCV , CI/CD , Vertex AI
- **Coursework:** Data Science, Data Analysis, Python Programming
- **OS:** Kali Linux, RHEL , Ubuntu , Fedora , Windows , MacOS

WORK EXPERIENCE

- **LUMIQ.AI** November 2023 - Present
Data Analyst *Noida, UP*
 - **GenAI:** Developed a custom text-to-SQL model using the **Transformers** library for HDFC Ergo, designed and curated training datasets with **BigQuery** SQL queries, and trained the model using Google **Vertex AI**.
 - **Data Model:** Designed and implemented data models for **Canara HSBC Client** and **HDBank Philippines**, optimizing data architecture for enhanced business insights and operational efficiency.
 - **Technical:** Leveraged **Looker Studio**, **BigQuery** to develop a visually appealing and user-friendly dashboard for **Google Cloud Costing** as well as Muthoot Gold Loans(POC).
 - **Dashboard and KPI Testing:** For ETLI Ensured 100% accuracy in data presentation through rigorous testing using of **Amazon Redshift** and **Athena**.
- **Edamama PTE. Ltd.** January 2023 - November 2023
Data Analyst *Manila, Phillipines*
 - **Ads Integration:** Reduced advertising costs by 40% and improved campaign performance metrics. For Facebook and Google by ingesting performance metrics to **Google BigQuery** using **VertexAI** and **Python**
 - **Data Warehouse Automation (ETL):** Automated data cleaning and upload processes for various **Python** scripts, leading to a significant reduction in manual effort for the data team. Additionally, implemented a transparent and fail-safe ETL workflow.
 - **Python Scraper for Competitive Pricing:** Developed a **Python scraper script** to fetch product prices from multiple websites, enabling us to offer customers more competitive pricing compared to competitors.
 - **Looker Studio Dashboards:** Developed data visualization dashboards using **Google Looker Studio**, empowering various stakeholders to effectively address their daily data needs.
 - **Ad-hoc Customer Segment Requests (CRM & Moengage):** Supported the **CRM** team by delivering accurate monthly and weekly customer segments for various **Moengage** campaigns and flows using complex **SQL** queries.
- **Wakefit.co** February 2022 - January 2023
Data Scientist *Bangalore*
 - **Data Marts Moengage:** Organized **Moengage** user data from AWS S3 into a clear format (Data Mart) using **Python Pandas**. This streamlined data made analysis with **Tableau** much easier.
 - **Data Mart Survey Data:** Constructed a Data Mart for survey data using a combination of MS Excel for initial data wrangling, **Pandas** for advanced data manipulation, and **AWS Redshift** for scalable data storage.
 - **Automated Data Updates - Apache Airflow:** Automated daily data updates for various stakeholders using **Apache Airflow** using **cron jobs**. This improved data accessibility and reduced manual effort in data delivery.

- **Bitbucket Repository Maintenance:** Contributed to maintaining the organization's **Bitbucket** main repository, demonstrating strong understanding of version control practices and collaboration principles.
- **Tableau Dashboard:** Developed a comprehensive **Tableau** dashboard to visualize key data points for the highly anticipated Sleep Internship program, supporting informed decision-making and program success.

August 2021 - February 2022

- **Wakefit.co**
Data Science Intern

Bangalore

- **ML Model:** Created an **RFM (Recency, Frequency, Monetary) model** to segment customers based on their buying behaviors, enabling targeted marketing campaigns and improved customer relationship management.
- **Tableau Dashboard:** Designed a comprehensive **Tableau** dashboard to track Return and Replacement Orders, streamlining data analysis and enabling stakeholders to identify trends and make informed decisions.
- **Automated ETL Pipelines:** Developed automated **ETL pipelines** for various dashboards, minimizing manual work required for daily data updates and ensuring data consistency.

January 2021 - February 2021

- **Sarvvid.ai**
Machine Learning Engineer Intern

New Delhi

- **Developed an Unsupervised Anomaly Detection System::** Built and deployed an unsupervised ML model using **Python** and **Scikit-learn** to identify potential unusual activity based on structured system health data, improving security posture.
- **Automated System Monitoring with ELK Stack:** Designed a system monitoring tool in **Python with Bash scripting** to collect structured health metrics (CPU, memory, uptime). Integrated with ELK Stack for real-time visualization and alerting.
- **Engineered a Real-Time Data Pipeline:** Used **Apache Kafka** to stream self-generated, structured health logs to **AWS S3**. This enabled both real-time analysis and downstream ML model training on operational system behavior.

EDUCATION

- **JSS Academy of Technical Education** Noida, UP
Bachelor of Technology in Electronics and Communication Engineering; *CGPA: 7.1*
- **Army Public School** Meerut, UP
Class XII; Science; Percentage: 80.4 *2017 – 2018*

COURSES/CERTIFICATION

- **Applied Machine Learning:** University of Michigan
- **Python Data Structures:** University of Michigan
- **SQL for Data Science:** University of California
- **Google Data Analytics:** Google
- **Deep Learning Specialization:** DeepLearning.ai

ACHIEVEMENTS

- **LumiQ:** LumiQ Spot Winner for excellence performance.
- **Digit College Ambassdor:** Acted as an Ambassdor, playing a pivotal role in building a community for tech-savvy individuals interested in coding competitions, gaming events and creating a platform for students to explore job and internship opportunities
- **Eyantra:** Finalist of Eyantra-2021 Competition hosted by IIT Mumbai.
